- Modern Middle East 386
- Israel and West Bank 386

"A fascinating and provocative work of history that shines new light on what is probably the biggest environmental and political challenge of our time."

—ROBERT F. KENNEDY, JR.

Far more than oil, the control of water wealth throughout history has been pivotal to the rise and fall of great powers, the achievements of civilization, the transformations of society's vital habitats, and the quality of ordinary daily lives. Today, freshwater scarcity is one of the twenty-first century's decisive, looming challenges, driving new political, economic, and environmental realities across the globe.

In *Water*, Steven Solomon offers the first-ever narrative portrait of the power struggles, personalities, and breakthroughs that have shaped humanity from antiquity's earliest civilizations through the steam-powered Industrial Revolution and America's century. Meticulously researched and masterfully written, *Water* is a groundbreaking account of man's most critical resource in shaping human destinies, from ancient times to our dawning age of water scarcity.

"Solomon's sweeping narrative, covering centuries, is awe-inspiring. I learned a tremendous amount of usable knowledge from this fine work."

—DOUGLAS BRINKLEY,
author of *The Quiet World*

"Water enlarges our understanding of how this vital element has shaped our past, providing enough evidence of humanity's ingenuity in the face of its challenges to offer reasonable hope that we will find ways to use it sanely."

—*The Los Angeles Times*

STEVEN SOLOMON is a journalist who has written for *The New York Times*, *BusinessWeek*, *The Economist*, *Forbes*, and *Esquire*, and has commented on NPR's *Marketplace*. He is also the author of *The Confidence Game*. Solomon lives in Washington, D.C.
